

CARDIO GYM CG2

CARDIOGYM CG2's Motorised Weight Selection System is innovative technology allowing users to conveniently and quickly select the weight with a push of a button while maintaining the smoothness only real weights can give. With fully adjustable pulley arms moving up and down as well as in and out, and additional center pulley console, CG2 provides more training options and angles.

The console will count your repetitions and or time, up or down so you can set challenging goals taking your strength workout to cardio.

The CG2 is ideal where safety, convenience and speedy weight changes are a priority, and the compact design is perfect for saving space.

VARIETY

Dual pulley combo offers more angles and variation

CONVENIENCE

Select the desired weight with a push of a button

SAFETY

Enclosed weight shrouds make for safer use

GOAL SETTING

Monitor performance with the CG2 console counting repetitions and time.
